

Unit 15, Saxon Way East, Oakley Hay Industrial Estate, Corby, NN18 9EX

PFAS Statement

Per- and polyfluoroalkyl substances (PFAS) comprise a “Class” of organic alkyl (carbon based) substances in which the carbon-hydrogen groups on which all (Per-) or many (Poly-) of the hydrogen atoms have been replaced with fluorine. PFAS is the widest definition and class name for all chemicals containing CF₂ or CF₃ groups. This includes discrete small molecules, monomers and short chain fluorochemicals which are used as part of a polymerisation process.

J&A Young (Leicester) Ltd, trading as Jayplas, does not use PFAS materials in the manufacture of their products. Materials such as PTFE, FEP, PFA, FKM, FFKM, FVMQ and FEPM (fluoropolymers), are not part of our supply chain, nor our manufacturing process.
