

REACH Declaration

Material which meets End-of-Waste Criteria is subject to UK and EU REACH regulations. The material recycled from Post-Consumer Waste materials is therefore subject to UK and EU REACH regulations. It is important to note that the UK is no longer subscribed to EU REACH or ECHA.

Under UK and EU REACH regulations, polymers are exempt from registration, therefore the polymers do not have to be registered and do not have a registration number. To the best of our knowledge the polymers recycled by Jayplas do not contain Substances of Very High Concern on the Candidate List (SVHC's).

REACH establishes specific duties and obligations on a business in the European Union (EU) and the UK under UK REACH which manufactures or imports a substance or article that includes a "substance of very high concern" (SVHC) in concentrations of more than 0.1% w/w. A substance which is listed on the "Authorisation List" published by the European Chemicals Agency (ECHA) (Annex XIV of the REACH regulations) cannot be manufactured or imported in the EU after a fixed date unless the ECHA authorizes the use of the substance for a specific use or uses. This update is current as at February 2026.

Further, the use of substances listed in Annex XVII of the REACH Regulations are banned in all articles or substances produced or imported in the EC except to the extent that the use complies with the specific restrictions contained in Annex XVII.
